

# INNOVATION AND INDUSTRIAL TECHNOLOGY

We stand by our customer's side

We operate in the industrial sector, in particular in the field of supply of goods (specific equipment and software) and services (maintenance, engineering, training)

We make use of professionalism and extremely qualified workers with a consolidated and proven know-how in the specific fields of intervention, to guarantee quality and reliability of the service offered. We use customized contractual forms and offer our administrative and technological advice to always satisfy the customer, with “key in hand” solutions. We guarantee full support in all phases of the project, from pre-analysis to final implementation, ensuring qualified after-sales assistance.

## MISSION

We believe in the value of every single person and the positive contribution they can make in every relationship or project development. Whether it's a customer, a supplier or a collaborator. We sincerely support our clients in the realization of their projects. Guaranteeing safety, protection of health and the environment, quality of processes and products, competence and punctuality in the provision of services.

## VISION

We always use innovative and at the same time sustainable and environmentally friendly resources, in all phases of our work.

Mina Service is part of  
Consorzio Industriale Lucano  
and of Rete Era (RERA)

## CERTIFICATIONS

We are committed to ensuring a complete and high-level performance with the essential objective of full customer satisfaction and respect for people and the environment. We pursue this policy through the provision of services in continuous improvement and with high quality standards.

This is why we choose to subject our activities to a recurring and certified control.

## OUR SERVICES

Mina Service offers a wide range of services, in order to satisfy the various demands of companies. From the design phases, to the construction and maintenance, all aspects are studied in detail and attention, to make sure that our customer's every need is met.

Management

WHAT WE DO

## ELECTRO-INSTRUMENTAL SYSTEMS

Plant automation and Power Distribution with innovatory technological solutions for the construction and management of plants of any dimension. The technical engineering department assures intense accuracy and precision.

Plant  
Automation and  
Energy  
Distribution

Cutting edge  
products  
and services

Technical office  
of engineering  
development

## TECHNOLOGICAL PLANTS

Design and construction of advanced and detailed systems, modern and effective, provided with technological and electronic control devices. We guarantee the best post-installation support and maximum safety, offering customers our highly qualified technicians and certified materials.

Electrical

Thermal and Air  
conditioning

Sanitary and  
Water

## SYSTEMS INTEGRATION

System integration, hardware and software for monitoring and control of machines, equipment and plants. Transformation of production methods, from analog systems to the most efficient digital systems.

Analytical  
systems

Machine  
Automation

Laboratory  
equipment

Services

## INDUSTRIAL SUPPLIES

Due to the extensive experience and a professional technical-commercial department, composed of specialists in the sector constantly updated on innovation and markets news, we are able to offer an integrated engineering service that allows our customers to find on the market the best possible technical and economical solutions.

Additionally, we are able to satisfy requests and deliver the goods in a very short time.

Mechanical

Pumps and  
Impellers

Filtration  
Systems

Electrical and  
Electro  
Instrumental  
Supplies

# INDUSTRIAL MAINTENANCE

We carry out proactive, corrective and extraordinary maintenance to retain the efficacy of the work process, avoiding machine downtime and safeguarding productivity.

## Types of Maintenance

Maintenance of methane preheating systems (electrical and thermal part).  
 Maintenance of technological systems (electrical, photovoltaic, heating, air conditioning, water, home automation, etc.).

## Target

Energy producers.  
 Pipeline management companies.  
 Aqueduct pipeline management companies.  
 Chemical and petrochemical plants.  
 Steel plants.  
 Manufacturers of rotating machines (turbines, compressors, pumps, alternators).  
 Industrial assembly companies

## Mode of Intervention

Preventive maintenance  
 Extraordinary maintenance  
 Corrective or improvement maintenance

## HYDRAULIC OIL FILTRATION SYSTEM

Oil filtration to avoid damage to the components of the automations and preserve the systems. Thanks to the partnership with Pall International, the service is offered quickly, 24 hours a day, with experienced staff and cutting-edge machinery.

**PALL** Pall Corporation

## ISO CONSULTING

Support services and integrated consultancy to companies, for obtaining quality certifications and their maintenance and updating.

### Services offered

- Business Check-Up
- Consultancy on UNI ENI ISO regulations
- Staff training, preparation for certification by an accredited body
- Simulation of inspection visit
- Assistance during the third-party inspection visit
- Assistance for the maintenance of the Quality System
- Implementation of Quality Management Systems

## ANALYSIS & QUALITY

Professional services for the analysis of combustion and monitoring of air, water, oil and light quality.

**Combustion  
Analysis**

**Air and light  
quality**

**Water  
Quality**

**Technical oil  
quality**

## ☉ PHOTOVOLTAIC SYSTEMS

Design and implementation of Photovoltaic Systems of all kinds, using the best technologies.

### Thorough Analysis

- Assessment of the site and its morphology
- Hydrogeological assessment
- Assessment of cover conditions
- Assessment of soil conditions

### Qualified Personnel

- Continuous refresher courses
- Recognized certifications
- Total availability

### Respect for the Environment

- Energy conservation
- Eco compatibility
- Solar electricity
- Economic savings

### Target

- Industrial rooftop installations
- Ground mounted installations
- Companies
- Private dwellings

# AIR TREATMENT PLANTS

(including with adaptation to anti-covid standards)

Construction, maintenance and operation of air treatment, conditioning, regeneration, and purification systems of all types and capacities, including compliance with anti-COVID standards.

**Air treatment and regeneration in:**

- Public and private offices
- Industrial establishments
- Shopping malls
- Supermarkets
- Airports/maritime stations
- Banks/post offices
- Healthcare facilities

- Communities
- Meeting/conference rooms
- Industrial Kitchens
- Restaurants
- Ceremony halls
- Hotels
- Cinemas and theaters

**Our offer is aimed at:**

- Private
- Industry
- Public Institutions
- Hospitals/retirement homes
- Organizations of all kinds

## SUCTION PLANTS

Design and implementation of advanced and efficient vacuum systems that can be customized according to the specific needs of each customer in each production sector.

We guarantee compliance with current regulations in the areas of hygiene, occupational safety, atmospheric emissions and the environment.

### Tailor-made installations

Air filtration, industrial ventilation, welding fume extraction, and dust filters.

### High Quality

Guaranteed by all products used in our production cycle and extensive supply network.

## TRAINING COURSES

We provide directly at our offices, in locations to be agreed or in online mode, the mandatory training required by law. The courses are held according to the procedures prescribed by the State-Regions Agreement.

## PEOPLE

We believe in the value of every single person and the positive contribution they can make. We are looking for people with passion and motivation.

A team works when it is made of people who believe in each other and collaborate in an open and constructive way, for the common well-being. Ours and of our customers.
